

COVID-19
PROTOCOL
**audiovisuele
sector**

NETHERLANDS COVID-19 PROTOCOL FOR THE AUDIOVISUAL SECTOR

Preamble

The different professions that are involved in audiovisual productions want to continue their work in a safe and responsible way. This is because of the direct and indirect economic interests and because of the vital cultural and social function of audiovisual productions: these act both as a connective tissue for society and as a source of information, amusement, emotion and reflection.

This protocol contains hygiene guidelines, precautionary and protective measures and rules of behaviour. Their purpose is to ensure that workplaces and work situations are as safe as possible during the COVID-19 pandemic. The protocol provides clarity to everyone who is involved in audiovisual productions, including professionals, businesses, public service and commercial broadcasters, clients, financiers, and insurers/guarantee funds.

The protocol focuses on the development, preproduction, production and postproduction of audiovisual productions in the broad sense of the term, both scripted and non-scripted, including news and informative programmes, entertainment, commercials, fiction, documentaries, animation, and interactive productions.

Activities on behalf of professional audiovisual productions are regular business activities. Work can take place in studio spaces equipped for this purpose as well as at other indoor and outdoor locations.

Since every audiovisual production is different, in practice there may be a reason for parties to deviate from this protocol if the situation demands it.

It is up to the parties involved - taking into account all precautionary measures - to consider carefully whether an audiovisual production can be continued.

It is advised to always consult the websites of the Dutch government and RIVM (National Institute for Public Health and the Environment) for the current general measures and regulations. You should also always consult the current regulations in the relevant safety region and/or municipality where the filming is planned. Additional measures may be taken for regions where infection rates are high for a longer period.

The protocol will be updated as soon as possible when new insights, advice or measures come into force. The protocol is published on the websites of NAPA and NCP, as is a list of Frequently Asked Questions.

- The NOS broadcasting organisation has its own protocol (for employees, contractors, suppliers, and guests).
- For viewings on location, the protocol of the NVBF applies.
- For music recordings, performing artists and (music) companies should follow the protocols for performing arts and orchestras.

Where the text has been modified compared to versions 9.1, it is marked with an orange line.

Strategy

The protocol is in line with current Dutch government measures and RIVM recommendations. Starting point are the general health and hygiene regulations:

- stay at home if you have corona-related complaints;
- ensure good ventilation;
- maintain good hand hygiene;
- cough and sneeze into the inside of your elbow.

Keeping a sufficient distance from others remains sensible, as this is proven to help prevent infections.

When people over 70 or from other vulnerable population groups are involved in productions, extra care is required.

Quarantine policy

- If you are unable to keep a sufficient distance from others at work, you must not have had any corona-related complaints in the 24 hours before coming to the work site.
- If you have corona-related complaints, stay at home and inform your employer. Use a self-test or get tested via the GGD.
- If you or someone you have been in close contact with has been diagnosed with a corona infection, you and your family members should follow the current isolation and quarantine regulations - even if you have been fully vaccinated or have recovered from an infection. You can find these via [guarantainecheck.rijksoverheid.nl/en](https://www.ggd.nl/en/onderzoek-en-toezicht/risico's-en-gevoeligheden/risico's-en-gevoeligheden-voor-covid-19)

Ventilation

Ensure good ventilation in all work locations. Open windows in indoor areas where people come together. Or make sure that the ventilation systems in buildings are set up in such a way that fresh air is brought into the building regularly. Follow at least the [Dutch Building Decree \('Bouwbesluit'\)](#) and the [national guidelines for the ventilation of buildings](#) (in Dutch only).

Workplace

Hybrid working (combination of working at home and at the office) is encouraged. Wherever possible, use a home working policy for work that does not necessarily have to be done at the office or location. It is up to employers/commissioning parties and workers to agree on the best possible allocation.

Current

Preventive testing?

Preventive testing means testing for the presence of the coronavirus *without* the person showing symptoms of COVID-19.

- As of 23 March 2022, the advice to use preventive tests for persons involved in filming is withdrawn.
- Also, the advice to use a preventive PCR test for those involved in high risk situations, such as actors who have to play intimate scenes with intensive physical contact, is repealed.

The Dutch Outbreak Management Team states that preventive self-testing in the current phase of the epidemic (infection pressure, vaccination rate and characteristics of the omikron variant) has only limited added value to prevent outbreaks and failure. However, (self) testing for corona-related complaints remains important and must be continued.

Face masks

The obligation to wear a face mask in and around public transport will cease to apply on 23 March 2022. Only at the airport (after security) and on the plane, the requirement to wear a face mask remains in force.

You are advised to wear a face mask inside and outside when it is busy. After all, wearing a face mask helps prevent contamination of yourself and others. Make sure the mask always covers your nose, mouth and chin.

Audience

As of 23 March 2022, there are no more restrictions on public activities and/or publicly accessible locations.

Audiences are allowed during recordings for AV productions, both in indoor and outdoor locations. This includes talk shows, game shows and recordings of performances.

Travel

Travel well prepared. When travelling to and from abroad, always check the current travel advice and regulations, including those concerning testing and quarantine obligations. Follow advice and obligations. Travel to countries marked orange or red is strongly discouraged.

You can find the current travel advice and regulation via [Netherlandsworldwide.nl](https://www.netherlandsworldwide.nl) (EN) / [Nederlandwereldwijd.nl](https://www.nederlandwereldwijd.nl) (NL) or in the [Travel App of the Dutch Ministry of Foreign Affairs](#) (in Dutch only).

For anyone travelling to the Netherlands, the advice is to do a self-test immediately upon arrival in the Netherlands and on day five after arrival.

Travelling within the EU/Schengen Area

- Within the EU, you can travel with the European Digital Corona Certificate (DCC). The DCC is available via the CoronaCheck app.
- As of 23 March 2022, the obligation to have a test, recovery or vaccination certificate for people travelling to the Netherlands from within the EU/Schengen zone will cease to apply. Travellers do need a [health declaration](#).

Travelling from outside the EU/Schengen Area

- There are no more entry restrictions for EU citizens travelling from outside the EU/Schengen zone to the Netherlands.
- For non-EU citizens the EU entry ban will also apply after 23 March 2022. There are exceptions, for example for travel from safe countries, for vaccinated travellers and for certain travel purposes.
 - Under certain conditions, an [exception to the EU-entry ban](#) applies to persons travelling to the Netherlands in connection with activities of a Dutch cultural or creative institution or organisation.
 - For this, you must be in possession of an [entry statement](#) (website in Dutch only) and an invitation letter from the relevant producer, broadcaster or institution. If applicable, you may also make use of the exception for business travellers.
- As of 23 March 2022, travellers from countries outside the EU/Schengen do not need a negative test result. Travellers do need a health declaration.

PRECAUTIONARY MEASURES

The following measures must always be observed by all persons present at work sites, such as in the office, in the studio and when recording on location indoors or outdoors, and for various productions.

1. Do you have any health complaints associated with corona, such as a cold, runny nose, sneezing, sore throat, slight cough, sudden loss of smell and/or taste, tightness in the chest, increased temperature or fever?
Stay at home and inform your employer.
Use a self-test or get tested via the GGD.
2. You and your housemates must comply with the current isolation and quarantine regulations if you or someone you have been in close contact with has been diagnosed with a corona infection - even if you have been fully vaccinated or have recovered. These can be found via [garantaincheckcheck.rijksoverheid.nl/en](https://www.garantaincheckcheck.rijksoverheid.nl/en)
3. Do not come to the work site if you have had corona-related complaints in the previous 24 hours and cannot keep a sufficient distance from others at work.
4. Ensure good ventilation at all working locations.
5. Ensure good hand hygiene.
Wash your hands regularly, at least six times a day, with soap and water for at least 20 seconds and then dry them thoroughly with a paper towel and throw it away immediately. You can also use a disinfectant hand gel containing at least 70% alcohol. Always do this: before going out, when coming home or at work, after blowing your nose, after travelling with public transport, before eating and after going to the toilet.
6. Cough and sneeze into the inside of your elbow. Use paper tissues to blow your nose, then throw them away and wash your hands.

7. Keep your distance from others whenever possible.
When setting up locations, make sure that this is possible (also when entering the location). Take into account room to move and walk, and the space taken up by furniture and equipment. Provide enough separate changing rooms.
8. Wear a face mask where required and advised due to crowding (indoors and outdoors).
9. Provide for daily and, if necessary, interim cleaning at the work location. Pay attention to frequently used hand contact points. Follow the [general hygiene guidelines](#) of the LCHV (Dutch National Center for Hygiene and Safety).
10. Appoint a Health & Safety Officer who has responsibility and authority for monitoring and ensuring compliance with the applicable protocol. If effective, combine this task with another function (for example, the in-house emergency and first-aid officer and/or the sustainability manager).
11. Ensure that everyone is aware of the instructions and precautionary measures that follow from the protocol and any specific elaboration per production. Ask contractors (freelance employees) to sign a declaration that they have read this protocol and agree to act accordingly.

The Health & Safety Officer should explicitly draw the attention of all persons who are unable to keep the required or advised distance from each other in their work to the fact that they must not have had any corona-related complaints in the preceding 24 hours before they are allowed to cooperate or come to the work location. They may be asked for their body temperature or it may be taken non-invasively without further processing.

12. When recording on location, always inform the municipality and/or Safety Region and (if applicable) local residents in advance in order to avoid ambiguity.

13. Always consult the current regulations in the relevant Safety Region and/or municipality where filming is planned. Additional measures may follow for regions where infection rates are high for a longer period.
14. When travelling to and from abroad, always check the current travel advice and the current regulations, including those relating to compulsory testing and quarantine. Follow the advice and obligations. You can find the current travel advice and regulation via [Netherlandsworldwide.nl](https://www.netherlandsworldwide.nl) (EN) / [Nederlandwereldwijd.nl](https://www.nederlandwereldwijd.nl) (NL) or in the [Travel App of the Dutch Ministry of Foreign Affairs](#) (in Dutch only).
15. Draw up a project plan for each production in which it is laid down how the protocol will be implemented.
16. Limit the number of people present. (Executive) producers must be critical of who does or does not need to be present on the set or at the work location. Avoid unnecessary set visits or spectators.
17. Where possible, apply a home working policy for work that does not necessarily have to be done at the office or location, such as script development, research and editing.
18. Organise meetings, castings, auditions or other pre-production work as well as post-production work via (digital) communication means where possible.
19. Identify in advance which employees are strictly necessary to carry out the work during the shoot. Work as much as possible in permanent teams, so that there is a limited, manageable and controllable group of workers.
Make sure that employees are recognisable per department/discipline (for example, by means of coloured bands). This makes it clear who should/should be present at the work location.
20. Structure (the preparation for) shooting days in such a way that workflows follow each other as far as possible and do not overlap, so that one department finishes work before the next department arrives. In the case of recordings lasting several days, plan the activities as much as possible in a consecutive working week.
21. Avoid unnecessary group formation. For example, by taking turns taking breaks and/or using several rooms. Changes of (groups of) employees should take place in a structured manner via walking routes, whereby sufficient distance from others is observed.
Also mark out walking routes in places where many people are likely to congregate at the same time (e.g. coffee corners, canteen/catering areas, toilets) in order to create as much one-way traffic as possible and to prevent 'cross traffic'. If necessary, place markings to monitor distances.
22. Clearly mark a filming location as a workplace and keep passers-by at a distance; for example, use construction fencing and other means such as information boards (by analogy with a building site). Ensure the presence of additional assistance for crowd control in the event of outdoor shoots.
23. If third-party locations are used or rented: do not use these locations if the owners or permanent users of this location - or their family members - are suffering from colds and fevers (38 degrees Celsius or higher) and/or tightness of the chest when they (also) use the room(s).
24. Where possible, realize an extra separation of plexiglas or plastic between fixed workplaces if it is not possible to maintain a sufficient distance from others (for example, in production vehicles).
25. Catering staff should ensure extra good hand hygiene. Where possible, hand out drinks and food in single-serving containers by placing them on a take-away table, or ensure that drinks and food are served.
26. Use personal equipment and tools as much as possible. Tools should preferably not be shared. Clean your hands before and after using

equipment, tools and other consumables, also from suppliers. If necessary, clean equipment and materials in the meantime.

27. Select the materials to be used in terms of size, weight and operation as far as possible on the basis of the possibility of one person operating them.

28. Where necessary, use extra equipment to ensure sufficient distance from others when recording (for example: monitors, rods, etc.).

29. Actors, presenters, performers, jury members and other participants should, where possible, provide their own clothing/styling/costume and make-up/hair and the placement of any audio transmitters.

30. If clothing/styling and make-up/hair are provided by an employee or in case of live instructions of stunts: always ensure good hand hygiene and use mouth masks where necessary. The same applies if a staff member applies audio transmitters to actors, presenters, jury members and other participants or guests.

31. All attributes used by a staff member are personal (e.g. personal make-up) or are only used once per actor, presenter, participant, jury member, extra or guest. Use a clear control system (e.g. logbook, colour/date stickers).

COLOPHON

NETHERLANDS COVID-19 PROTOCOL AUDIOVISUAL SECTOR Version 9.2 – 23 March 2022

The Netherlands COVID-19 Protocol for the Audiovisual Sector has been adopted in consultation with and with input from professionals from DAFF (Dutch Academy For Film), the various industry and professional associations, public-service and commercial broadcasting organisations, businesses, funds and the Taskforce for the cultural and creative sector. The content of the protocol has also been coordinated with the Ministry of OCW (Education, Culture and Science); after adoption, the document has been submitted to the Ministries of OCW and EZK (Economic Affairs and Climate).

The protocol has been drawn up by a task force commissioned by NAPA (Netherlands Audiovisual Producers Alliance) and NCP (Association of Dutch Content Producers). The most recent version of the protocol is always available on the websites of both associations, as well as a list of Frequently Asked Questions.

[Netherlands Audiovisual Producers Alliance \(NAPA\)](#)
[Association of Dutch Content Producers \(NCP\)](#)

Task force

Doreen Boonekamp (chair), Antoinette Beumer, Roel Burgman,
Nelsje Musch-Elzinga, Floor Onrust, Janneke Slöetjes
Legal support: Hugo Klaassen (Denkk Juristen)

The protocol was established with the support of the
Cultural Fund for Audiovisual Producers (CFAP).
